(57) **ABSTRACT**

An apparatus for editing information about a parameter for capturing a medical image includes a storage device configured to store at least one piece of group information including information about a change to the parameter for capturing the medical image and information about an associated parameter to be changed together with the parameter; a display configured to display a parameter change history including the at least one piece of group information; and a controller configured to control the display and the storage device, wherein the at least one piece of group information is arranged based on an order in which a parameter in the at least one piece of group information is changed.
